

Tusitala Barcelona is a company that wants to bring hand fans to contemporary fashion and to current ways of dressing, of relating to people, and of moving. The fan is an accessory that transmits sophistication, femininity, freshness, joy, playfulness, fashion, culture, character, and many other positive concepts. It is with this aim that we carefully prepare each collection, attentive to the trends in colors, shapes, and patterns that the best *haute-couture maisons* outline every season for us.

We take care of all the details; the result is a product ideal as gift, not only because of the quality of the fan but also because of the jute bag and the packaging.
